1. Social Grade is the socio-economic classification used by the Market Research and Marketing Industries; most often in the analysis of spending habits and consumer attitudes. Although it is not possible to allocate Social Grade precisely from information collected by the 2001 Census; the Market Research Society has developed a method for using Census information to provide a good approximation of Social Grade. 2. In this table; people are classified by the Approximated Social Grade of their Household Reference Person.

Households
